AMENDMENTS TO THE SPECIFICATION

Please amend the title as follows:

ISOLATED <u>ANTIBODIES FOR</u> HUMAN KINASE PROTEINS, NUCLEIC ACID MOLECULES ENCODING HUMAN KINASE PROTEINS, AND USES THEREOF

Please amend the abstract as follows:

The present invention provides <u>antibodies</u> that selectively bind to human kinase peptides, <u>including monoclonal antibodies</u>, antibodies coupled to a detectable substance, compositions <u>comprising an antibody and a pharmaceutically acceptable carrier</u>, and isolated antibody <u>fragments</u>. <u>amino acid sequences of peptides that are encoded by genes within the human genome</u>, the kinase peptides of the present invention. The present invention specifically provides isolated peptide and nucleic acid molecules, methods of identifying orthologs and paralogs of the kinase peptides</u>, and methods of identifying modulators of the kinase peptides.
